

ONESOURCE™ TRANSFER PRICING

Documenter Express

UPDATE YOUR STUDIES WITH CONFIDENCE AND EASE

The Documenter Express version of ONESOURCE Transfer Pricing is an intuitive web-based software solution that enables you to update your transfer pricing studies in an easy, time-efficient manner. By creating a workspace of elements to be used in transfer pricing documentation, it enables you to leverage your work for multiple studies.

Easy to Manage Solution

In the first year of your license, our ONESOURCE Transfer Pricing professionals will upload your existing transfer pricing studies into this new software version. In all following years, it will enable you to update your comparables searches and economic analyses using the most recent data available.

You will be able to adjust any information that may change from year to year. Once you make the necessary modifications, your reports are ready to be reviewed. Your documentation can easily be exported to Microsoft® Office Word or PDF format.

The Documenter Express version of ONESOURCE Transfer Pricing produces the supporting documentation that satisfies the revenue authority requirements of all countries following the IRS Regulations and the OECD guidelines.

Comparables Company Databases

It is important to have options when deciding which comparables database(s) to use. Thomson Reuters understands this and has customized the Documenter Express version of ONESOURCE Transfer Pricing to be compatible with a wide range of global, public, and private comparables company databases. Some of these databases include the Data Suite offered by Thomson Reuters, Bureau Van Dijk and Standard & Poor's.

Features of the Documenter Express version of ONESOURCE Transfer Pricing include:

- Efficient updates previous transfer pricing studies
- Automatic updates of past comparables searches and economic analyses
- Multiuser sharing of studies
- Report configuration options
- Export to Microsoft Office Word capability

Hosted Solution

The Documenter Express version of ONESOURCE Transfer Pricing is hosted in the elite Thomson Reuters Data Center. The Eagan, Minnesota data centers have been designed from their inception around continuous operation. Our main campus has three data center facilities with more than 100,000 square feet of critical high-density raised floor space, utility service-independent power capacity, hardened security features, and unparalleled redundancy for critical systems.

Built-in redundancy allows for maintenance without any service interruption to end-users. Redundant power feeds from a separate utility substation. Ten diesel generators with 19 megawatts of power supply back-up for the entire complex. Separate Rotary UPS systems containing multiple 500KVA modules can sustain power for 30 minutes.

Our data centers are prepared for a scenario that could possibly affect service – from inclement weather and power failure to a threatened security breach from any source.

Transfer Pricing Support and Service Solution

From the moment you become an ONESOURCE Transfer Pricing client, you're guaranteed an outstanding level of support. You are immediately assigned a Client Service Manager (CSM) whose responsibility is to ensure your satisfaction with your transfer pricing solution. The CSM will be your liaison to the rest of the company and will guide you through the process of learning and implementing your solution.

Thomson Reuters also has professional services teams staffed with transfer pricing professionals that have gained years of experience working at the "Big 4" and the IRS, as well as with our own roster of over 1,000 clients worldwide.

Our Professional Services Group can also provide transfer pricing training and support over the Internet or at our 7,000 square feet training facility. They share their practical knowledge through lectures and interactive sessions on a variety of topics. Our transfer pricing professionals are not only experts in their respective fields; they also understand your needs and what it takes to accomplish your goals.
